### **DETAILED ACTION**

This Office Action is in response to the amendment filed on 11/12/04. Currently, claims 15, and 18-21 are pending.

#### ***Specification***

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 15 and 18-21 recites the limitation "an uncovered upper surface" in claim 15, line 2. There is insufficient antecedent basis for this limitation in the claim. For examination purposes on the merits, the Examiner will interpret the limitation as only "a semiconductor substrate" having a surface.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2812

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 15 and 18-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hong  
US Patent Application Publication 2002/0100950.

6. Hong discloses the apparatus as claimed. See figures 1A-2F, and corresponding text where Hong teaches an apparatus comprising: a semiconductor substrate **200** having an uncovered upper surface (paragraph [0026] broadest interpretation of substrate to include the deposited layers 201/202); a trench **203** etched into the substrate (paragraph [0026]); a dielectric **205** filling said trench (paragraph [0030-0031]), said dielectric having an upper surface that is planarized with the upper surface of the substrate (paragraph [0030]); and a plurality of ions implanted into the dielectric layer (paragraph [0032-0033]).

7. Pertaining to claim 18, Hong teaches the apparatus, wherein the dielectric comprises a silicon dioxide layer (paragraph [0030]).

8. Pertaining to claim 19, Hong teaches the apparatus, wherein the dielectric is damaged by the plurality of implanted ions (paragraph [0032-0033], **Note:** the Examiner considers it to be inherent that the dielectric is damaged by the plurality of implanted ions, since the ions are injected in a substantially vertical direction perpendicular to the surface in side the insulating layer).

9. Pertaining to claim 20, Hong teaches the apparatus, wherein the plurality of ions are selected from the group consisting of silicon, carbon, nitrogen, and oxygen (paragraph [0032-0033], nitrogen).

Art Unit: 2812

10. Pertaining to claim 21, Hong teaches the apparatus, wherein the upper surface of said dielectric and the upper surface of said substrate are coplanar (figures 2F: paragraph [0034]).

***Response to Arguments***

11. Applicant's arguments with respect to claims 15-20 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
